

WORKSHOP SAFETY

**To all attendees of Delphi training courses at the Spartan Close,
Warwick site.**

Please Note!

As from 1st January 2007, all trainees attending training courses will be required to wear safety footwear when working in the workshop, garage and/or clean room areas.

Failure to provide and wear adequate safety footwear may prevent the trainee from working in the areas above. A small stock of shoes of different sizes will be kept on-site. However, these will be loaned to **visitors from outside the UK** only.

Delphi will continue to provide workshop coats, latex gloves and ear defenders as before.

Many thanks for your co-operation.

Tim Roberts
Senior Technical Instructor
Delphi Training Centre.
